5. Press Ok

Delete a Contact

1. Press Contacts
2. Select the contact to be deleted
3. Press Delete twice

Voice Dialing

1. Press Contacts
2. Press Voice if it does not have a check mark indicating that it is already active
3. Speak the name exactly as listed or say “Call” and the name. If there is more than one number for a person, you can say their name followed by “at Home,” “Mobile,” “Office,” or “Work.”
4. Once Voice Dialing is activated, you Press Contacts, hear a tone, and say the name, going forward

Miscellaneous Telephone Operations, Options, and Information

Placing a Call on Hold and Answering Another Call

1. When a call is received, the cursor/highlight on the display moves to the line/button appearance of the incoming call. This allows you to be automatically connected to the call when you lift the receiver or press the Speaker button
2. If you are already on a call, your choices are:
   3. Hold the existing call and answer the new call
      • Depress the Ans-Hold button
   1. End/Drop the existing call and answer the new call
      • Depress the Ans-Drop button
   4. Send the new call to Coverage
      • Depress the To VMail button
   4. Ignore the new call and silence the ring tone
      • Depress the Ignore button

Speed Dial Buttons

1. Speed Dial (SD) buttons are those which you can program to dial numbers. This provides additional automatic calling capability to the native Contacts feature of the phone.
2. Only one telephone number per button can be configured. A maximum of 16-digits may be entered per button
3. Programming Summary:
   • Get a Dial Tone and dial (#80) – the # sign must be dialed
   • Use the left/right arrow keys to navigate to the Features Page if the button to be programmed is not displayed
   • Navigate to the SD button to be programmed and either select it or Depress Ok
   • Depress (9 for calls outside the system) and the number to be called as you would normally dial it
   • Re-Depress the SD button being programmed
   • Hang up
   • Press Phone (exit)
4. To Place a call:
   • Press the SD button desired
5. Speed Dial buttons may be labeled with a name using the Labeling feature detailed below

Busy Buttons

1. Busy buttons are those which have been configured at the request of your Telephone Administrator to illuminate when the associate phone is in use. This allows you to see when someone in your office is on the phone
2. When depressed, the button calls the associated station
3. Busy buttons may be labeled with a name using the Labeling feature detailed below
4. A busy button’s lamp blinks at 60 Interruptions per Minute when the associated station calls you
Labeling SD & Busy Buttons

1. The Label feature provides the ability to customize the label (13 characters Maximum regular Feature buttons and 7-9 Characters for Auxiliary buttons). To do this:
   - Press Menu
   - Select Options & Settings and Depress OK
   - Navigate to Applications Settings and Depress OK
   - Navigate to Personalized Labels and Depress OK
   - Navigate to the SD or Busy button to be labeled and Depress it
   - Using the Touchtone Dial, enter the desired name in the New Label field
     - Use the More button to receive Soft-Key options for changing the characters to Symbols, and Characters:
       - Abc (Mixed Case, 123 (Numbers), abc (Lower Case), ABC (Upper Case)
   - Press Save when finished
   - Observe Backup In Progress, Backup Successful on the top line of the display indicating that your changes have been successfully backed up to the central server. Report any failures to your Telephone Administrator

Forward an Extension

1. Get Dial Tone on the extension to be forwarded
2. Press *2 and the extension to where the phone will be forwarded (typically interoffice only)
3. To deactivate forwarded calls, get Dial Tone on the line that was forwarded
4. Press #22

Note: If your calls are not answered at the forwarded-to station or if the forwarded-to station is busy, your calls will be re-directed to your Coverage Path, e.g. to Voice Mail or to Assistant then Voice Mail.
