IT Briefing

July 18, 2013

North Decatur Building

4th Floor Auditorium

IT Briefing Agenda

- Office 365 Update
- SimonWeb Recovered Items
- 25Live Update
- Infrastructure Project Updates
- LDAP Cert. Upgrade
- PS Tools and Bundles Upgrade
- System-Wide Network Interruptions
- Jay Flanagan
- Jay Flanagan
- John Wilson / Jennifer Stevenson
- Mike Politinsky
- Anne Marie Alexander
- Kaven Moodley / Tanjalon Solomon
- Scott Davis

Jay Flanagan

Manager, Messaging Team, Infrastructure

Office 365 Update

O365 Testing

- Messaging Team moved
- Working through a few issues / features
 - Free / Busy (issue)
 - Room Availability (issue)
 - Using netid@emory.edu (feature)
 - Authenticating for shared calendar access (feature)

Moves to O365

- Preliminary Schedule

– UTS – Messaging Team	7/03/2013 – 7/24/2013
– UTS – Office 365 Project Team	7/25/2013 – 8/07/2013
– UTS – The rest of UTS	8/08/2013 – 8/28/2013
– Prepare the Schools for the move	8/29/2013 – 9/03/2013
– Law School	9/03/2013 – 9/24/2013
– GBS	9/03/2013 – 9/24/2013
– Theology	9/03/2013 – 9/24/2013
– Emory College	9/03/2013 – 9/24/2013

Unified Messaging

- Working and sending voice mail to O365
- Coverage Paths
 - Manual
 - Early movers
 - Fix in October 2013

Archives

- Working through issues with gathering data for the moves
- Can see archives in cloud from Outlook client on premise, but not from OWA

2-Way Trust

- Needed for next set of moves
- Beginning initial work on discovery and mitigation
- Still targeting Sept. 2013 for implementing

Working with EHC

- VDT Cache Issue
 - Exchange 2013 (we are in this version in O365) can dictate the amount of cache downloaded
 - What is the right amount? MS recommendation
- Working with Storage Team on storage needs for the VDT

Major Incident Update: Deletion & Recovery of SimonWeb Records

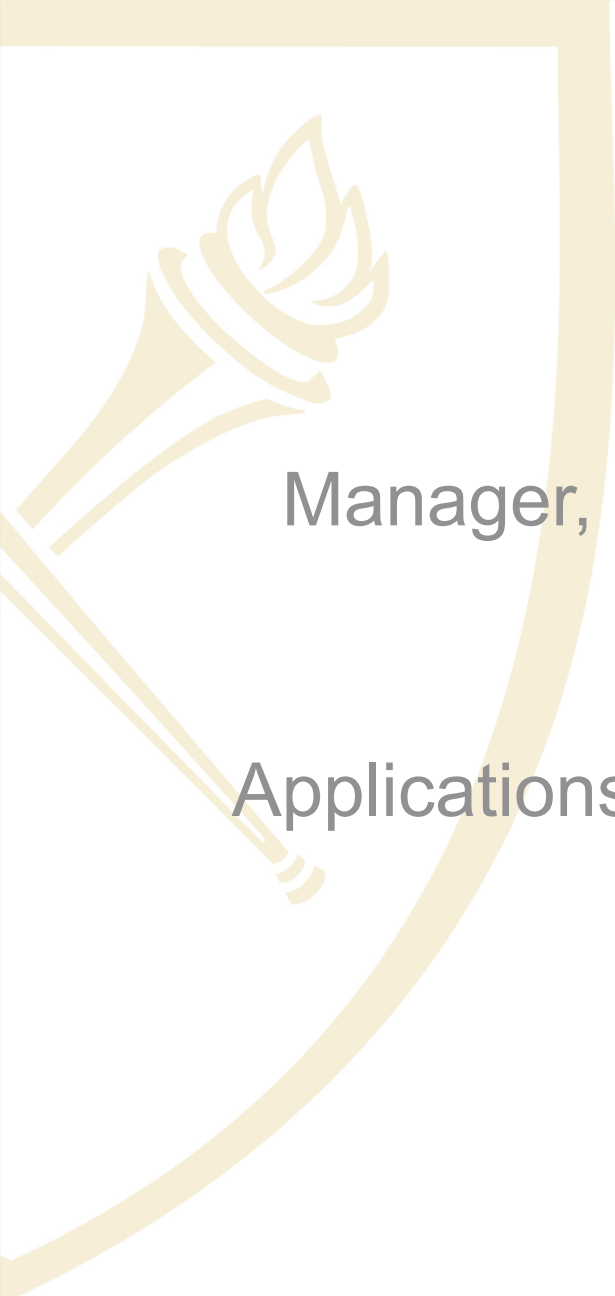

Deletion & Recovery of SimonWeb Records

- [INC01855248](#) – July 12 (12:35 pm – 3:18 pm)
- **Impact:** Loss of records from Amcom database
- **Root Cause:** Network issues on 7/11 caused a disruption in data flow from EHC AD feed to ESD
 - This caused downstream effects to integrated systems, including Amcom
 - Delete syncs were queued in the ESB connector, which resulted in deactivations and deletes of records via AmcomService
- **Resolution:** The Database was successfully restored from a 24-hour back-up. All impacted records were restored.

Major Incident Update

Questions

John Wilson

Manager, UTS Business Systems, Enterprise Applications

Jennifer Stevenson

Applications Dev/Analyst, Lead, UTS Business Systems, Enterprise Applications

25Live Update

25Live Update

What Happened???

- Cut over to SaaS solution – June 30, 2013
- 3 immediate challenges
 - Healthcare VDT
 - Notifications
 - Shibboleth (CollegeNet)
 - Incorrect security group placements
- Most issues reported are variants one of these categories or are training related

25Live Update

Communication was not perfect but...

- Steering committee
- Strategy committee
- Super users, healthcare and university
- Training sessions – Led by Jennifer
- Training sessions – Vendor led
- Site visits
- Videos

25Live Update

What is being done to resolve issues?

- Healthcare VDT – upgrade planned for late July early August
 - IE 9 support will be available
 - R25 Web Viewer deployed as work-around
- Notifications – Resolved
- Shibboleth – manual group placements in process now
 - 80% complete
- Ongoing training and support

25Live Update

Thank you for your patience!

Questions

Mike Politinsky

Manager, Network Engineering, Infrastructure

Infrastructure Project Updates

Core Router Refresh Update

- Completed NorthCampus and Clarimont routers
 - The legacy Foundry MLX routers are ready to be decommissioned
- Cox Migrations continue to conclude around 8/19. We are moving all "University Networks" that attach to the COX core routers to the new Cisco Nexus 7000 series routers this summer
 - The activity consists moving 5 buildings per night every Monday & Wednesday night between the hours of 9:00pm and midnight through early August
- Planning phase for NDB, EUH and EUM

IPAM Update

IPAM is IP Address Management

- New solution currently serving DHCP for Academic Wireless
- DHCP and DNS by the start of school year for Academic, ResNet, SecureAdmin and VoIP. Healthcare is planned for September
- Retiring DHCP server in September, retiring DNS server in October

Edge Refresh Update

- Buildings completed this year: Rich Building, Nursing Building, 1525 Clifton, Woodruff Library wireless enhancement
- Buildings in Process: 59 Executive Park, Decatur Plaza, TEC B, Wesley Woods, Mobile Classroom upgrade at Oxford College
- Buildings in Next Phase: EUM Woodruff & Davis-Fisher Buildings, Burlington Rd Arts Building, WoodPEC, DUC, Grady Hospital Extension, Miller Ward Alumni House
- Buildings Planned: Callaway Building

Critical Location

Voice Service Updates: FLARE

- FLARE Experience
 - What is it? – The Avaya Flare® Experience is an user interface that turns an iPad into a mobile collaboration environment
- When can we expect to see initial deployment?
 - Testing the new product continues and we hope to be able to offer this new service in a limited availability pilot sometime in the 3rd quarter of 2013
 - A partial/full rollout will be determined after initial pilots have been completed

Questions

Kaven Moodley

Manager, PeopleSoft HR Systems, Enterprise Applications

Tanjalon Solomon

Business Analyst III, PeopleSoft HR, Enterprise Applications

PS HRMS 9.1 Tools and Bundles Update

Project Team

- Mike Davidson – PSAdmin/Tools
- Rick Ferguson – Payroll Lead Developer
- Steve Kaiser – Payroll Developer
- Scot Kenyon – Technical Lead
- Kim Madsen – Interfaces
- Kathy Moore - HR/Benefits Lead Developer
- Sandra Smith – PSAdmin/Bundles
- Tanjalon Solomon – Project Manager
- Rob Vannah – Payroll BA Lead

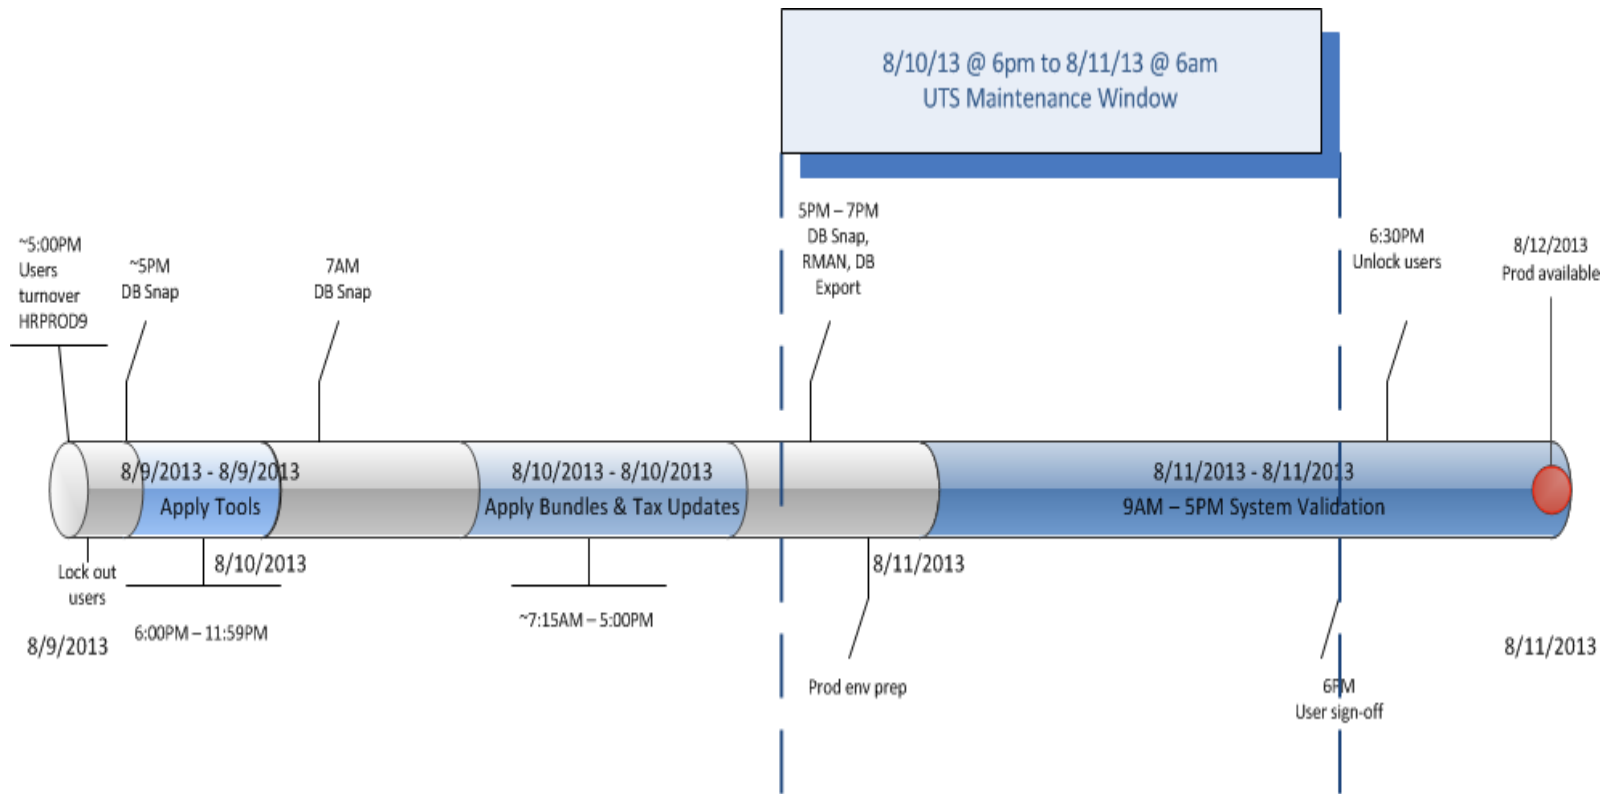

Project Overview

- Upgrade PeopleTools to 8.52.15
 - Current version: PT 8.51.14
- Apply Bundles 5 - 12
 - Current version: Bundle 4
- Apply Tax Updates 13A and 13B
 - Current version: 12F

Project Overview

- Why are we doing this?
- It is the customer's responsibility to keep their system current as Oracle releases updates to PeopleSoft
- Tools Upgrade:
 - Improve existing tools and introduce new tools to help streamline the tasks associated with managing PeopleSoft applications
- Bundles:
 - Contain an accumulation of fixes for a specific time period
 - Add new functionality to your current release application without having to upgrade
 - Allows selected features to be applied more frequently instead of having to wait 3 years for any new capabilities delivered in a major release.
 - Avoid the Oracle standard response “get up to date on bundles” in order to resolve system issues

Go Live Weekend Timeline

PS HRMS 9.1 Tools and Bundles Update

Questions

Scott Davis

Communications Architect II, UTS Architecture

System-Wide Network Interruptions

System Wide Network Interruptions

- [INC01852715](#) – July 10-11 (10:11 p.m. – 2:15 a.m.)
- [INC01854753](#) – July 12 (4:49 a.m. – 9:36 a.m.)
- **Impact:** Loss of Network connectivity for all users
- **Triggering Events:** The act of upgrading the code of the DWDM and the router reboots, triggered a massive OSPF convergence
- **Resolution:** Separating the old and new routers allowed router tables to clear and all connectivity to be restored
- **Next Steps:**
 - Consult with Cisco to fine-tune the BFD timers
 - Reschedule DWDM code upgrade when issues have been resolved
