**FCPX: 2.9 THEMES**

Themes include Video Generators, Transitions, and Titles that fall into a theme. These are useful if you want your video elements to be uniform.

**Intro to Themes**

Themes can be found in the Themes Browser. Click on the Themes icon in the Toolbar to show or hide the Themes Browser. Themes are divided into multiple categories: Boxes, Bulletin Board, Cinema, Comic Book, Data, Documentary, Event, Filmstrip, Kinetic, Nature, News, Photo Album, Scrapbook, Sports, and Tribute. Each category is split into Video Generators, Transitions, and Titles.

Apply Themes like you would apply Generators, Transitions, and Titles. See 2.6 TITLES AND TEXT, 2.7 TRANSITIONS, and 2.8 GENERATORS to learn more on how to modify these elements.
