Update Windows!
using windows update...

Run Windows Update!
(Enable daily Auto-Updates)

Many viruses exploit the weaknesses in un-updated Windows PCs!
Update your version of Windows here:
windowsupdate.microsoft.com

Follow the update instructions on Microsoft’s website and be sure to
always install all the critical updates.

Coupling your updated Windows Operating System with Symantec AntiVirus
will ensure you experience the network safely and securely.

Enable your built in FIREWALL!!

Microsoft releases dozens of Windows Security Patches monthly.
Symantec releases dozens of AntiVirus updates monthly.

Whether you use a Mac or PC, please update your Operating System.
