Questions

Storage Service Offerings

Russ Norman

Storage Services

UTS Storage Team

- What we Support:
 - Approximately 1PB of Enterprise /Content Addressable/Archival Class Storage
 - Storage delivery through Fiber Channel and IP based networks
 - 300 port fiber channel network at two Data Center Locations
 - Remote FC and IP based data replication
 - Tape and Disk library based backup

Storage Services

Campus Service Offerings

- The UTS Storage Team Currently offers two network attached storage subscription services to the Emory Campus. These services include:
 - Enterprise NAS Subscription Service
 - Archival NAS Subscription Service

Storage Services

Enterprise Class NAS

- Enterprise Class NAS Definition:
 - No Single points of failure
 - RAID5 Protection with hot spares
 - RAID Layout for Performance
 - File system snapshots
 - 24x7 Hardware/Software support
 - 24X7 Hardware call home and remote vendor support
 - 99% Availability (At the NAS head)
 - Support for CIFS, NFS, ISCSI, and Active directory

Storage Services

Enterprise Class NAS

- Yearly Subscription Cost: \$1.50/GB
- The Enterprise Class NAS Service has been offered by Emory IT since 2007. This service provides highly available and protected NAS shares. This service is built on Enterprise Class NAS and provides the highest level availability and support. The service includes 14 days of file system snapshots which allows users to undelete or revert to older file revisions. No backup is included in this service. Backup services can be purchase at an additional cost based on requirements.
- Supported Protocols:
 - ISCSI
 - CIFS
 - NFS
- Typical Usage:
 - User File shares
 - Backup Locations
 - Content stores

Storage Services

Archival Class NAS

- Archival Class NAS Definition:
 - Single points of failure allowed for data access
 - RAID6 Protection with hot spares
 - RAID Layout for maximum capacity
 - File system compression enable
 - Snapshots available for Administrative backups only
 - 8X7 Hardware/Software support
 - 98% Availability (At the NAS Head)
 - NFS, ISCSI support

Storage Services

Archival Class NAS

- **Emory Self Service Archive (New Offering)**
- Yearly Subscription Cost: \$0.75/GB
- The ESSArc offering is designed to provide a customer initiated file archiving service for Emory departments. Customers who subscribe to this service will archive their data using an rsync based utility from their Windows, Mac, or Unix/Linux servers. Subscribers can schedule archives which will synchronize the data in their storage pool as needed. Subscribers can also partially or fully restore files as needed. This service also provides the option of having multiple copies of data at up to three different data centers. Each copy of the data is billed at the subscription rate. The ESSArc service is similar to several internet based file archiving offerings, but is managed by Emory and all data is stored on Emory resources.
- **Supported Protocol:**
 - RSYNC service (Linux, Unix, Windows, Mac)
- **Usage:**
 - File system backup/recovery

Storage Services

Archival Class NAS

- **Emory File Share Protection Service (New Offering):**
- Yearly Subscription Cost: \$0.75/GB
- The Emory File Share Protection Service is offered solely for backup of subscriber shares provisioned by the Emory Enterprise NAS Offering. Built on archival class NAS, this service is used to backup NAS snapshots to archival storage locations. Two revisions of the data are maintained on the backup targets. Additional copies can also be purchase if desired. This service features automatic offsite backup, where the backup copy of the subscriber data will not reside in the same Emory Data center as the primary copy stored on Enterprise NAS.
- Supported Protocols:
 - CIFS
 - NFS
- Usage:
 - File share backup/recovery

Storage Services

Subscribing to a Service

- The first step to subscribe to a service is completion of the storage request form. This form can be found on the Emory UTS Storage Web site. Please submit the form via a Remedy ticket to the UTS Storage Team. Please include the FAS code the subscription should be billed to. Once the subscription request has been received, a member of the UTS storage team will contact the requestor. Depending on the request, the subscription can be activated in as little as a day or as much as several weeks.
- The request form will be added to help.emory.edu to simplify the request process for the customer. The Storage team and Remedy team are working to schedule this improvement.

Storage Services

Cost Recovery

- All Emory NAS services are funded through cost recovery. UTS is given no budget to provide these services. Capital to purchase hardware for these services is provided by a loan from the Emory internal bank which UTS must payback with interest. In order to provide these services, UTS must recover all cost associated with them. The subscription fees charged by UTS cover the costs to provide these services. No “profit” is made by UTS on any services provided.

Storage Services

A large, bold, orange question mark is centered on the slide. The word "Questions" is written in a bold, yellow, sans-serif font across the middle of the question mark.
