Duo Two-Factor Authentication Update

What is Two-Factor Authentication (2FA)?

- Two-factor authentication helps to solve the problem of stolen usernames and passwords being used to abuse information resources.
- Your NetId and password are required, but are no longer enough to gain access to a 2FA protected system.
- Along with a password, something you know of have may be your second factor.
- Without the correct password, and possessing the second factor, access to a resource is denied.

Duo Policies

- Unless otherwise specified, users will only be prompted for a second factor when logging in from a non-Emory University or Healthcare network, such as their home, a coffee shop, another University, etc.
- Children's Healthcare and Grady Memorial Hospital will be considered trusted.

Planned Duo Integrations by 10/10/16 Except **

- F5 VPN – University has > 5,200 Enrolled
 - Healthcare Enrollment, 5/24; Required 5/31
- RSPH – Done
- University Office365/OWA Portal - WIP
- Healthcare Citrix/VDT – Start in June
- Healthcare OWA/O365 – Start in July
- PeopleSoft HR – Start in June after GreyHeller – Duo Mini-Proof-of-Concept
- PeopleSoft Student (OPUS) – Start in June after PSHR
- **PeopleSoft Finance (Compass) – February 2017
