What is Two-Factor Authentication (2FA)?

- Two-factor authentication helps to solve the problem of stolen usernames and passwords being used to abuse information resources.

- Your NetId and password are required, but are no longer enough to gain access to a 2FA protected system.

- Unless otherwise specified, users will only be prompted for the Duo second factor when logging in from a non-Emory University or Healthcare network, such as their home, a coffee shop, another University, etc.
